ABOUT

KKUM Studio is a young, creative, innovative and experimental architecture and landscape design studio based in Bandung.

In our architectural designs, we create simplicity and functional design integrated with humanity and nature, sometimes unconventional and unexpected, proposals that allow the building to reflect its own personality, while staying true to its corefunction.

In our Landscape design, we like to play with materials, function and plants for new configurations, leading to ideas that offer a constanly changing prespective. The work we do in one discipline can and does influence the work we do in others.

Sometimes the ideas are simple a design might be based on a planning type, for example, or an observation about the history or topography of a place.
